Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
• "I want to grow crops that give higher yield." • "I need an easy way to decide which crop to cultivate." • "I want to reduce farming losses."	• "Am I choosing the right crop for my soil?" • "Will this crop survive the current weather conditions?" • "How can I increase my income through better crop selection?"

	PERSONA NAME <i>Farmer</i>	
DOES • Tests soil manually or sends it for analysis. • Consults local experts, fellow farmers, or agricultural officers. • Worried about financial losses.		FEELS • Confused due to too many choices and lack of clarity. • Uncertain about weather and crop success. • Worried about financial losses.
