

Project Demo Planning

Date	15 July 2026
Team ID	XXXXXX
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the OptiCrop project, problem statement, objectives, and importance of AI in agriculture.	2	Farisa Almas
2	Technology Overview	Explain the technologies used: Python, Flask, Scikit-learn, Pandas, HTML, CSS, and Machine Learning model.	2	Farisa Almas
3	Application Walkthrough	Demonstrate the Home page, About page, and navigation between pages.	2	Farisa Almas
4	Crop Prediction Demo	Enter sample soil and environmental values and display the recommended crop generated by the ML model.	3	Farisa Almas
5	Project Architecture & Repository	Briefly explain the project structure, Flask backend, model loading, and GitHub repository organization.	2	Farisa Almas
6	Conclusion & Future Enhancements	Summarize project outcomes and discuss future improvements such as fertilizer recommendation, weather integration, and multilingual support.	1	Farisa Almas

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain challenges faced by farmers in selecting suitable crops and the purpose of OptiCrop.
2	Solution Overview	Describe how Machine Learning analyzes soil nutrients and environmental conditions to recommend the best crop.
3	Live Feature Demonstration	Show Home page → About page → Prediction page → Enter sample values → Display recommended crop.
4	Q&A Session	Answer questions regarding dataset, ML algorithm, Flask application, project workflow, and future enhancements.
